

Five screens. *One promise.*

The v2.0 worker desktop runs invisibly in the background. The user opens it weekly to confirm their compounding portfolio is still growing. Five screens, dark by default, brand purple throughout — aligned with the OnlyWorks design system v1.0.

01

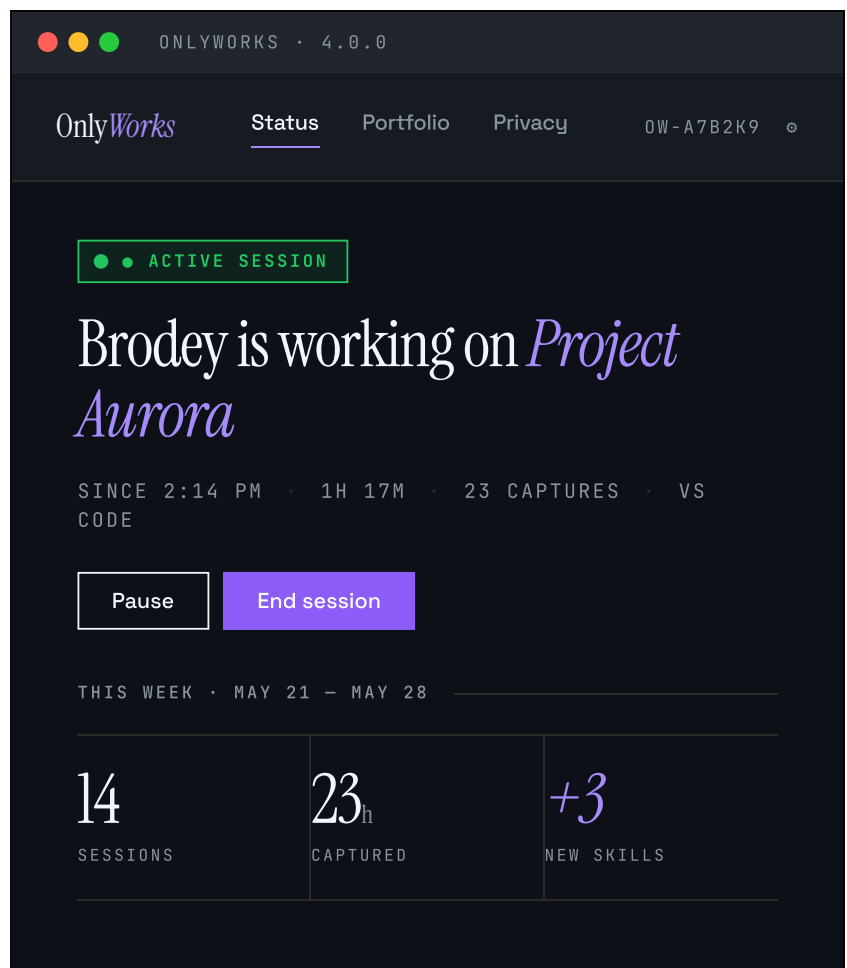

Status

The default landing screen. Shows the user that capture is running, what the current session looks like, and how their portfolio is growing this week.

Primary job: reassure. No friction. No decisions.

TRAINING DATA

Training data sharing

Help us build OnlyWorks' own AI. Sensitive content filtered automatically.

CAPTURE RUNS CONTINUOUSLY IN THE BACKGROUND WHILE SIGNED IN. ADJUST PER-APP RULES IN PRIVACY.

02

Portfolio

The artifact. Verified skills, organized by category, with evidence drawn from captured work — using the design system’s semantic colors (accomp / strength / growth).

Primary job: prove. To the user that the work was real. To the HM that the skill is real.

Help build OnlyWorks' own AI

Captured frames are used to train our own work-aware model — replacing third-party AI calls at scale. Sensitive content is filtered automatically before any frame is uploaded.

DESIGN SYSTEM ALIGNMENT

This document uses the OnlyWorks design system v1.0: brand purple #7C3AED, zero border-radius, Instrument Serif display + Space Grotesk body + JetBrains Mono labels. See [00-design-system.html](#) for the full token spec.

WHAT IT ISN'T

Worker desktop only. Hiring-manager dashboard, public profile page, Stripe checkout all live on the website surface — light palette, Instrument Sans body.

NEXT

Interns build these screens using `owButton()` + `owShowModal()` + the dark token set from the design system. Match structure here; the system handles components.
